This column is the list of available Paint Codes/Colors for the total years that the 240Z was manufactured.	This column is the total count of cars in the Registry by Paint Code.	This column is my estimate of the total percentage of cars painted each color based on equal distribution by year.	This column is the actual total percentage of registered cars painted each color based on equal distribution by year. The highest value is in green text and the lowest value is in red text.	This column is an estimate of the total number produced in this paint color based on the current Actual Paint percentage and a total of 164,384,240Zs.	This column is the absolute difference between the estimated Paint percentage and the registered Paint percentage. With 600 cars registered, the difference should be within 3.51% at a 95% confidence level. If the difference is within that value, it's shaded green. If not, it's shaded red.	This column is the total count of cars in the Registry by Paint Code and Interior Color, i.e., the total count of registered cars painted that color with this interior color.
